

WHAT THE PARTIES ARE SAYING ABOUT THE NONPROFIT SECTOR

Deep in campaigning mode, the provincial parties have been articulating their visions for Ontario. What are they saying about the nonprofit sector? Not much, really. All parties are talking about some parts of the sector – like health care, mental health, child care services, and the environmental issues. But very little is being said about the nonprofit sector as a whole and our important role in the economy and in society. Let’s grab the opportunity over the next few weeks to remind the politicians of the need to consider the sector when formulating plans and to partner with the sector in order to create a fair, sustainable economy and a more inclusive society.

Not all parties have released detailed platforms, but we’ve scoured official documents to find what the parties are saying about the sector. Whatever the election results, the ONN is committed to working in partnership with the next government to strengthen the sector and create thriving communities.
